

Directions for use:

1. With the lock set to your combination, press the black release button and remove the lock and cable unit from case.

2. While pressing the black release button, slide the hidden lock tab sideways to unlock the security cable.

3. Fasten cable to an immovable object, press the black release button and insert cable bullet end back into locked position.

4. Open the hinged door and insert your iPod upside down. Foam spacers are included to adjust the fit.

5. Close the case. Push lock and cable unit into the case opening until it clicks.

6. Spin the combination lock dial to lock.

The iPod must be removed for docking or charging. iPod not included.
