

STOP-Lock™ Notebook Security Package

You CAN Stop Notebook Computer Theft

Warnings, barcode, and indelible tattoo provided by the Stop Security Plate eliminate resale value of the computer.

Prevent walk-off thefts and enable the safe recovery of lost, stolen, or misplaced laptops with Secure-It's notebook security package. This security package combines our locking cable and Stop Security Plates into an integrated security tool that provides double protection.

The ultimate benefit is that the STOP- Lock protects school, corporate, medical, and government data, reducing the risk of legal claims, further security breaches, and devastating public relations problems.

Maintain your organization's credibility and security-conscience image by using the STOP-Lock security package to protect your computers and office equipment.

Package contents:

The STOP-Lock Security Package includes these components:

- STOP-Lock security plate with barcode, indelible tattoo, and lock connector
- Secure-It's notebook security cable (6 feet long) with lock and keys
- Carrying pouch for cable

High quality, double protection for less than the cost of most single-security solutions.

The STOP-Lock provides the best value in computer protection for security directors.

No place to loop the cable? Order Secure-It's lock-down fastener No. DSC-560B

- STOP-Lock makes computers police identifiable, eliminating resale value.
- STOP-Lock provides two modes of protection for the price of one.
- STOP-Lock is available at quantity pricing to schools, corporations, government facilities, etc. to protect computers and invaluable data for pennies on the dollar.
- STOP Security Plate installs easily and the lock snaps into the plate. No key required to lock the computer.
