

Stop Computer Theft with the PC Tab Central Alarm System

From

Secure-It

What is it?

PC Tab is a revolutionary security system that provides 24-hour protection for any type of equipment and internal components. Unauthorized tampering of your equipment results in immediate notification (audible or silent) to your security department.

Security Features:

- Prevents unauthorized removal or tampering of protected equipment
- Easily expandable to accommodate any number of computers!
- Protects against RAM Chip theft!
- Visible LED Tamper indicator
- Provides 24-hour security
- No drilling, bolting, or gluing!
- Fits ANY computer
- Installs in minutes

**Protect Your Investment Today!
Quick and Easy To Install**

Secure-It

Features:

Visible LED Tamper light indicates which sensor has been tampered with.

Ease of installation

If existing wiring can be utilized, the system installation is as simple as attaching the stickers to the equipment, and connecting them together with the connecting wires.

Multi-purpose

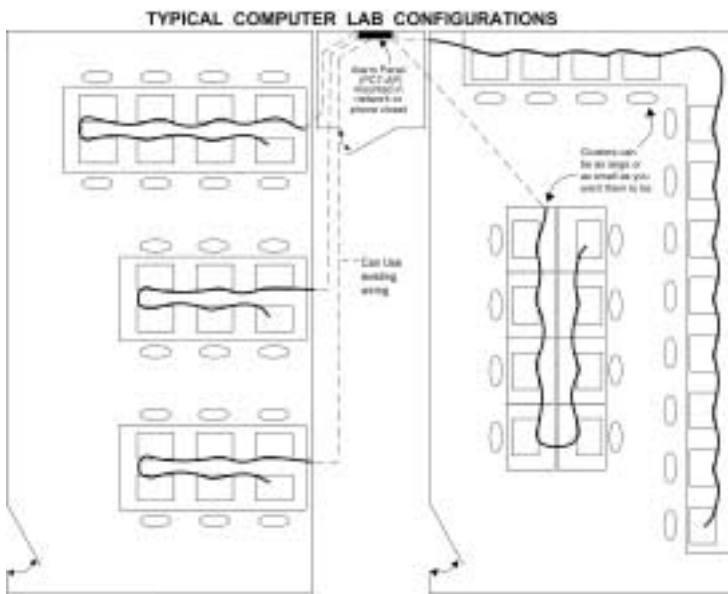

Can be used on any type of equipment that is prone to theft.

Protects internal components

By putting the sticker across the seam of the CPU, the PC Tab becomes a Universal solution to prevent unauthorized opening of ANY type of computer.

Any configuration

Connecting wires are available in various lengths, to be able to attach multiple items on one zone. The 50' wire is ideal to add an overhead projector into a cluster of computers.

University Lab Packages

PCT-FULL25 - 25 Computer Lab Package - \$1,250

includes:

- 1 PCT-AP
- 52 PCT-TSWT
- 45 PCT-CW06
- 4 PCT-CW12
- 2 PCT-CW25
- 1 PCT-CW50
- 4 PCT-45SN
- 4 PCT-T56
- 25 PCT-TAB

PCT-FULL10 - 10 Computer Lab Package - \$695

includes:

- 1 PCT-AP
- 21 PCT-TSWT
- 18 PCT-CW06
- 2 PCT-CW12
- 1 PCT-CW25
- 2 PCT-45SN
- 2 PCT-T56
- 10 PCT-TAB

Specifications:

Security Sensor

The security sensor includes a visible LED indicator and patented closed loop circuit sticker. Easily snaps open to allow replacement of used PC Tab stickers.

Connecting Wires

Attached to sensors in a daisy chain fashion. The first wire in the line plugs into the adapter (below).

Adapters

Available in RJ45 and RJ11 versions. The adapter converts the connecting wire plug to fit in a standard jack. This jack needs to be wired to a central location for connection to our alarm panel or your existing system. Easily make use of existing unused telephone or network wires.

End-of-Line Terminators

Available in different resistance values to fit our alarm panel or your existing security system. Makes it a supervised, tamper resistant loop.

Alarm Panel

Secures up to 8 zones, expandable to 32 zones in 8 zone increments with the use of the 8-zone expander module. The panel is modular, with RJ-45 ports for zone wires. This allows for simple connection if you are converting unused network wires into alarm zone wires.

- PCT-TSWT - Security Sensor - \$12.78
- PCT-CW06 - 6' Connecting Wire - \$4.44
- PCT-CW12 - 12' Connecting Wire - \$5.64
- PCT-CW25 - 25' Connecting Wire - \$8.24
- PCT-CW50 - 50' Connecting Wire - \$13.24
- PCT-45SN - RJ-45 Adapter - \$4.95
- PCT-11SN - RJ-11 Adapter - \$4.95
- PCT-T56 - End-of-line Terminator 5.6K - \$4.95
- PCT-TRV - Custom Resistance Terminator - \$4.95
- PCT-TAB - Spare Security Stickers - \$1.95
- PCT-AP - Central Alarm Panel - \$395.00
- PCT-APE - 8-zone Expander Module - \$195.00
