

Keep Private Information Private with 3M™ Filters

From

Secure-It

Excellent for open, high traffic environments where on-screen data needs to be kept private. People looking from a side angle see only a solid black screen. No blurring or image distortion.

Features

- 3M's patented microblouver technology - works like tiny vertical blinds to block ambient light and narrow the viewing angle so that only persons sitting directly in front of the monitor are able to see on-screen data
- Reduced screen glare to help prevent eyestrain and headaches related to computer monitor use
- New Sleek black flat frame design coordinates with new black monitors.
- Fits both LCD and CRT desktop monitors.
- Reduced static charge and dust buildup when properly grounded
- Lifetime warranty

Secure-It

Notebook Privacy Filters

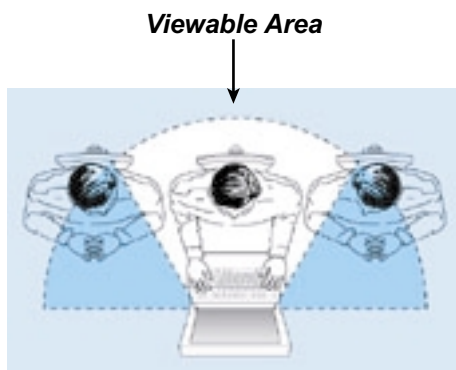

The 3M™ notebook privacy screen enables you to keep your information private anywhere you work.

Features

- Helps protect computer screen from scratches and abrasions
- Provides worry-free privacy for laptop computer users
- Improves contrast and privacy without blurring or distorting the images on the screen
- Easy to attach and remove; stays in place even when notebook is closed
- Lifetime Warranty

3M's patented microlouver technology works like mini-blinds on windows. The screen is clear, crisp and bright when viewed by the user. When viewed from the side, the microlouver feature blocks the information to reveal a dark, black screen. A unique feature designed to safeguard sensitive information from prying eyes.
